ColorGuard 25 with Spectrascape[®]

ColorGuard 25 with Spectrascape is a robust economical paint system offering a .2-.3 primer thickness with a nominal 1 mil total dry film thickness over a galvanized substrate on 29 gauge steel. This system sets the bar for chalk and fade with ratings similar to a PVDF. It is engineered to resist peeling or cracking for 25 years and is backed by a company who has stood behind their products and warranties for 40 years.

Oil Canning: All flat metal surfaces can display waviness commonly referred to as "oil canning". "Oil canning" is an inherent characteristic of steel products, not a defect, and therefore is not a cause for panel rejection.
