# COOL DuraTech® x/ & ColorGuard 25 Products & Finishes

## COOL DuraTech® x/ keeps the heat out and the color brilliant.

- Superior color retention and resistance to chalk and fade.
- Weather-tested and protected against corrosion with a Zincalume® coating.
- DuraTech® x/ energy saving **COOL** colors reduce the demand for energy.

### The ColorGuard 25 Value System

ASC Building Products has enhanced its product line with roofing systems where value is a must and installation is a snap. ColorGuard 25 includes a 0.15 - 0.30 mil thick primer and a 0.70 - 0.80 topcoat system applied over a galvanized substrate. This system has been engineered to resist chalk and fade over a span of twenty-five years and is confidently backed by a written warranty.

### Oil Canning

All flat metal surfaces can display waviness commonly referred to as "oil canning". "Oil canning" is an inherent characteristic of steel products, not a defect, and therefore is not a cause for panel rejection.
