SRI: 53 • LRV: 28

NATURAL RUST¹
SRI: 32 • LRV: 10
(Subject to upcharge)

IRONOX²
SRI: N/A • LRV: N/A

MEASURED ON A SCALE OF 0 - 100

Light Reflective Value (LRV)
Measures how much visible light a color reflects and how much it absorbs. The **higher** the LRV, the **more reflective** it will be.

Solar Reflective Index (SRI)
Measures the amount of **heat reflected** from painted metal roof. The higher the SRI value, the cooler the metal will be, helping cut down on **energy costs** to keep your **home cool**.

SRI values in accordance with ASTM E1980 and are based on independent testing. Cool Roof Rating Council (CRRC) performance values (for CA Title 24) are based on color families and will differ from above.

SRI=Solar Reflective Index. LRV=Light Reflectance Value. GA= Gauge of Steel. *Clear acrylic coated.

¹Please note, these colors are batch sensitive (may have color variation) and are directional in nature. Different batches are not to be mixed on projects.

²IronOx is black steel (uncoated and unpainted), that rusts naturally. No warranty is offered or implied. Only available in 22 GA Nu-Wave® Corrugated.

REPRESENTATION OF COLORS MAY VARY DUE TO PRINTING LIMITATIONS.

Sample color chips are available upon request. Consult your ASC Building Products representative for more information.
