Wildfire Home Safety Checklist

Be *cool*, go *green* with metal.

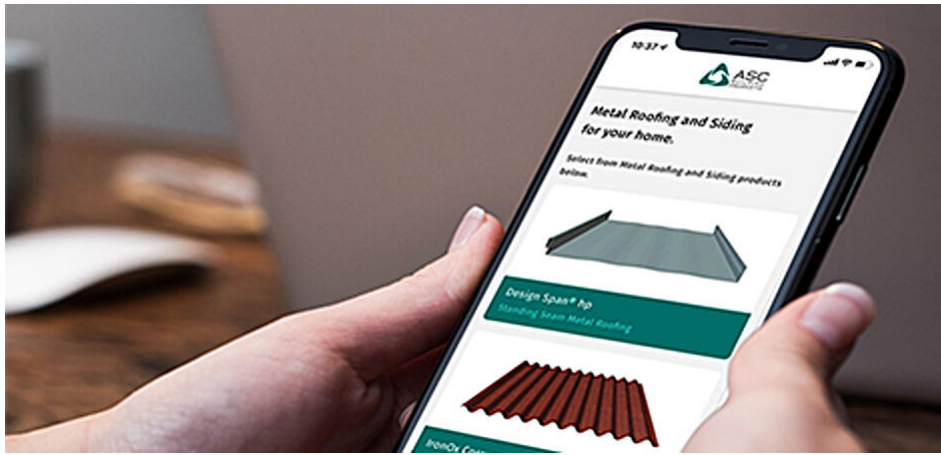

Many people think metal roofing will heat up their home or cause excessive glare.

In reality, our metal roofing is energy efficient and can save you as much as **25%** in energy costs! Our metal roofing is painted using energy efficient "cool" paint technology which helps to reflect infrared heat, in turn, keeping your home cooler.

Learn more about our energy efficient cool paint technology by clicking below.
