

FLASHING LOCATIONS

ASC Building Products recommends all properly installed roofs include flashings. Visit www.ascbp.com for a full list of trims, flashings, installation guides and product details.

OIL CANNING: All flat metal surfaces can display waviness commonly referred to as "oil canning." Oil canning is an inherent characteristic of steel products, not a defect, and therefore is not a cause for panel rejection.

Pitch Required = Trim manufactured based on roof pitch. Please ensure roof pitch provided at time of order entry.

INSTALLATION GUIDES & RESOURCES

This tri-fold is meant to display the most common trims and flashings but is not all inclusive. Scan the QR code to access all of our installation guides and resources, which contain a full list of metal roof flashing, trims & accessories.

1) Also available in 32" net coverage.

2) IronOx is black steel (uncoated and unpainted), that rusts naturally. No warranty is offered or implied. Only available in 22 gauge Nu-Wave® Corrugated.

* Matte Black is not a rated product by the Cool Roof Rating Council.

** Please note these colors are batch sensitive (may have color variation) and are directional in nature. Different batches are not to be mixed on projects.

We recommend you request a sample of current stocked material to review actual color before ordering to ensure color accuracy. We are not responsible for color variations.

REPRESENTATION OF COLORS MAY VARY DUE TO PRINTING LIMITATIONS.
 Sample metal color chips are available upon request.
 Consult your ASC Building Products representative for more information.
