FLASHING LOCATIONS
ASC Building Products recommends all properly installed roofs include flashings.
Visit www.ascbp.com for installation guides and product details.

OIL CANNING: All flat metal surfaces can display waviness commonly referred to as “oil canning.” “Oil canning” is an inherent characteristic of steel products, not a defect, and therefore is not a cause for panel rejection.

Pitch Required = Trim manufactured based on roof pitch.
Please ensure roof pitch provided at time of order entry.
