## VistaFoam<sup>®</sup> Closure Strips

Application

Designed to close gaps in roof and sidewall applications

## **Features and Benefits**

- Material thickness\*: 1", 1-1/2", 2"
- Polyethylene foam for exceptional strength and compressibility
- Interlocking dovetail connections available on many profiles
- Resists damaging ultra violet rays and ozone deterioration
- One person installation
- Color: Charcoal
- Available with adhesive applied to assure positive positioning during installation
- Hundreds of profile configurations available
- \* Not all closure profiles available in all material thicknesses

### **Product Selection**

## Many profiles available to match most OEM panel profiles. Popular items listed.

Maximum service temperature is 212° F. Applications where service temperature exceeds 212° F should be avoided, as the material can experience thermal degradation.

### Installation and Application Considerations

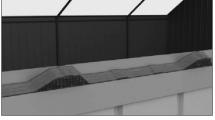

VistaFoam closure is not recommended for installation or placement beneath translucent or clear materials where it may be exposed to direct sunlight. The potential intensification of the sun's rays may result in increased temperatures which could effect the condition of the material.

Step 1: Ensure the self-adhesive closure configuration fits the roof panel used.

Application

Step 2: The inside closure fits the underside of the panel. Position the honeycomb texture side outward for optimal UV protection.

Application

Step 3: Place the roof panel over precut closure configuration for a snug fit. Attach panel over closure with the proper fasteners.
